Response to Amendment

1. Applicant's amendment and arguments of March 16, 2009 have been entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. Claims 1, 2, and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baer.

Baer discloses a method of thermally protecting the motor 55 of an electric sprayer having a control and a temperature and which operates a user-selected controlled pressure, the method comprising: monitoring the temperature of the motor 55; reducing the controlled pressure from the user-selected controlled pressure and continuing to spray when the motor temperature exceeds a predetermined level; and switches off the motor when the motor temperature exceeds a predetermined level. Also, pressure relief valve 79 protects against unwanted pressure increases in the apparatus. Regarding claim 6, it would have been obvious to one having ordinary skill in the art at the time the invention was made that since valve 79 relieves pressure, the temperature at the pressure relief stage could be less than the temperature required to shut off the motor. The method can be used in a variable speed electric sprayer since the limitations of the protection method have been disclosed by Baer.

4. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breunsbach et al.

Breunsbach et al. disclose an apparatus which thermally protects a motor of a spray system which operates to maintain a user selected controlled pressure, the apparatus comprising a temperature sensor 66 which monitors the temperature of the motor and a controller 20 which switches off the motor when the motor temperature exceeds a predetermined level by terminating the spray cycle. The apparatus will carry out the method since it comprises the required structural limitations and the teaching can be applied to a variable speed electric sprayer also.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
